Priority

With regard to the Applicant's claim for domestic priority under 35 U.S.C. 119(e), the applicants state that "The Examiner's contentions regarding provisional applications 60/429,252, 60/412,155, and 60/400,265 are, therefore rendered moot" since only allowable claims remain pending. However, such "contentions" regarding the domestic priority claims are not rendered moot by the amendments to the claims. US provisional application No. 60/429,252 (application '252) still shares no common inventors with the instant application and still fails to provide adequate support under 35 U.S.C. 112 for any aspect of the instant application, since the application fails to describe any aspect of a respiratory analyzer. US Provisional application No. 60/412,155 also fails to provide adequate support under 35 U.S.C. 112 for at least any respiratory analyzer comprising a flow module including a housing, flow meter, and gas sensor as claimed in pending claim 10 of the instant application. US Provisional application No. 60/400,265 still fails to provide adequate support under 35 U.S.C. 112 for pending claims 1-12 and 19-24 of the instant application because the provisional application lacks adequate description of the pathogen filter as claimed. Therefore, none of the domestic priority claims are granted.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The section entitled "REFERENCE TO RELATED APPLICATIONS" on p. 1 of the specification and the 1st paragraph on that page beginning "This application claims priority", appearing on lines 2-5 of p. 1 were deleted.

The changes to the specification were made since none of the domestic priority claims were found to be valid, as noted in the previous Office action and above.
